

VET Practitioner Research Conference

26-27 April, 2018

VDC, 379 Collins Street, Melbourne

In 2018, the Australian VET Research Association (**AVETRA**) in partnership with the VET Development Centre (**VDC**) and the Victorian TAFE Association (**VTA**), will hold Australia's **first** VET Practitioner Research Conference.

The conference recognises the emerging field of VET-based applied research that promises to contribute to Australia's innovation agenda and innovation within the VET sector.

VET practitioners and professionals – teachers, trainers, designers, assessors, managers – will be invited to present on their research (short and longer presentation slots will be available), participate in research capability development workshops, and network with other practitioner researchers.

**A call for presentations will be made by
AVETRA in November.**
